La Metelli nasce il 1° Agosto 1962 quale officina per lavorazioni meccaniche. Nel 1970 prende avvio la produzione delle parti motore e già nel 1975 inizia la fabbricazione delle parti freno e frizione idrauliche. Un ulteriore impulso all'espansione giunge nel 1991 con l'installazione della linea per la produzione dei giunti omocineticici a cui si aggiungono i semiassi nel 1999. Nel luglio del 2001 la Metelli S.p.A. acquista il 100% della società GRAF S.p.A., produttrice di pompe acqua e dischi freno. Nel 2008 vengono introdotte le pastiglie freno e nel 2010 le ganasce freno a completamento della gamma frenante. **Infine nel 2012 vengono lanciati il Kit distribuzione con pompa acqua e il kit cuffia.**

*Metelli was established on 1st August 1962 as a mechanical engineering workshop. In 1970, the company started producing engine parts and, in 1975, began manufacturing hydraulic brake and clutch parts. A further boost to expansion came in 1991 with the installation of the line for the production of constant velocity joints, later expanded in 1999 to include driveshafts. In July 2001, Metelli Co. acquired 100% of GRAF Co., a leading manufacturer of water pumps and brake discs. In order to complete the brake parts range Metelli introduced brake pads in 2008 and brake shoes in 2010. **Then in 2012 Metelli introduced the timing belt Kit with water pump and boot kit.***

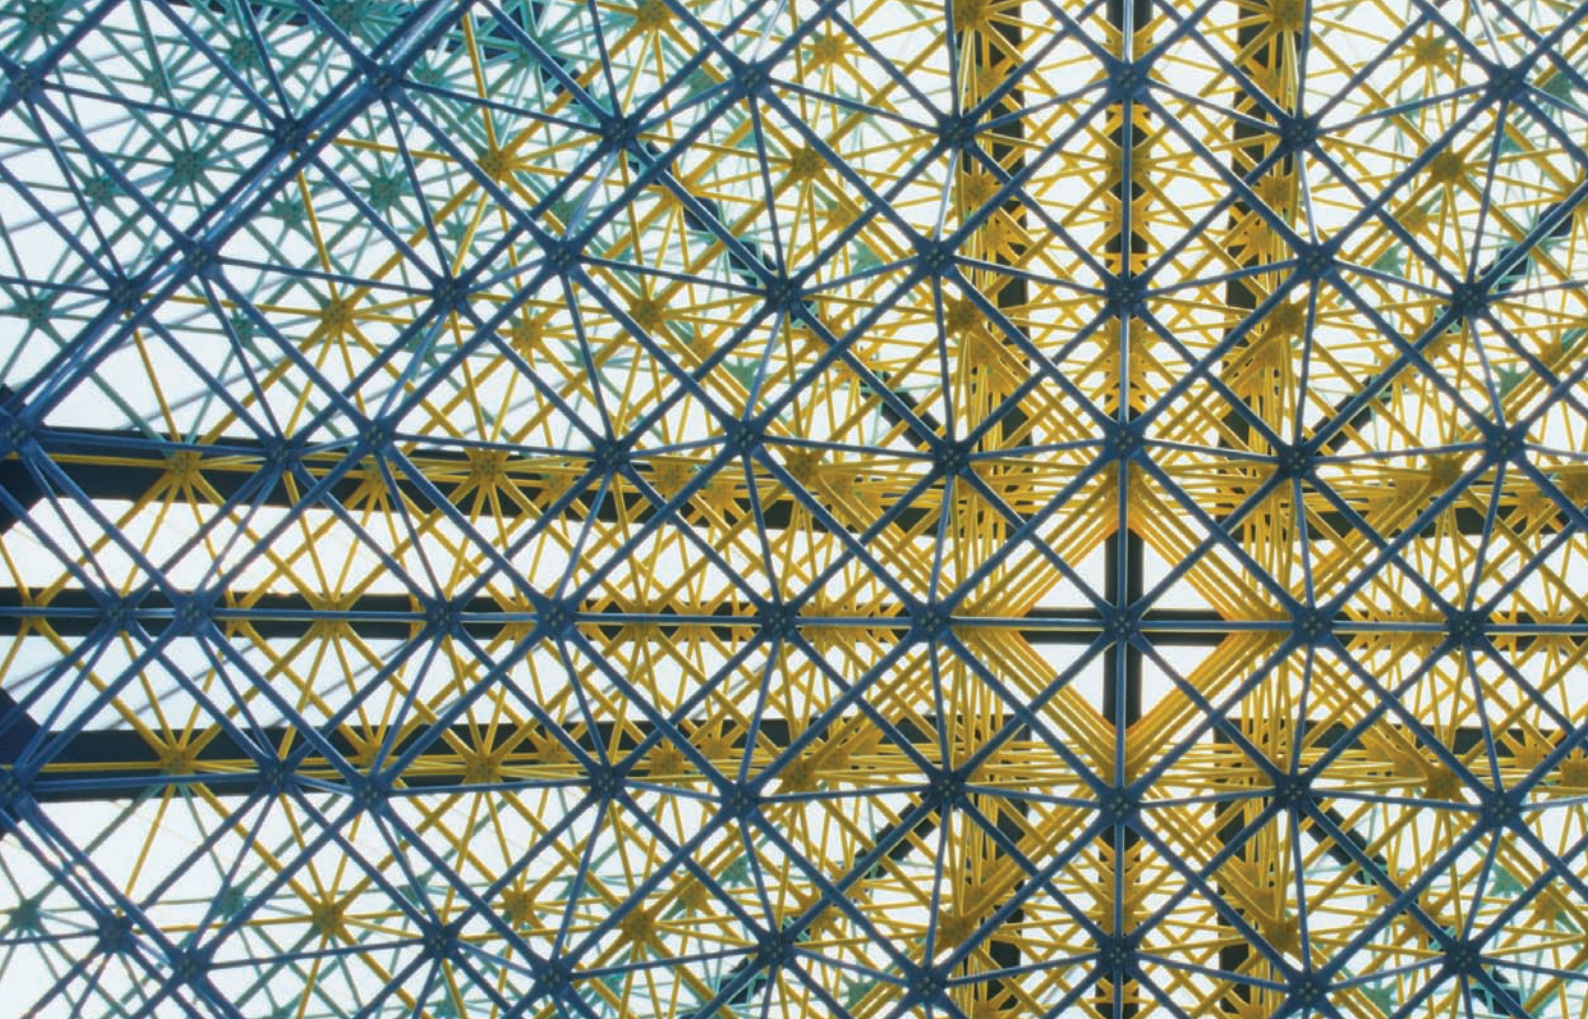

*La société Metelli a été créée le 1er août 1962 comme atelier d'usinage. En 1970, l'entreprise a démarré la production de composants pour l'industrie des moteurs et a lancé en 1975 la fabrication de pièces de freinage et d'embrayage hydrauliques. En 1991, dans le cadre de sa politique d'expansion, la société a installé une nouvelle ligne pour la production de joints homocinétiques, à laquelle s'est ajoutée en 1999 celle des transmissions. En juillet 2001, Metelli S.p.A. a racheté la totalité de la société GRAF S.p.A., producteur leader de pompes à eau et de disques de frein. En 2008 nous avons introduits dans notre gamme les Plaquettes de Freins et en 2010 les Machoires de Frein à complètement de notre programme de freinage. **En 2012 nous avons introduits les kit distribution avec pompe à eau et les kit de soufflet de transmission.***

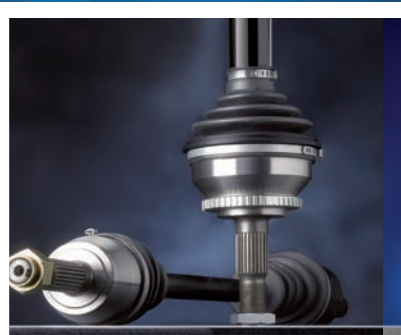

*Die Firma Metelli wurde am 1. August 1962 als mechanische Werkstätte gegründet. 1970 beginnt die Produktion von Motorteilen und bereits 1975 die Fertigung von hydraulischen Bremsenteilen und Kupplungsteilen. Einen weiteren Impuls zur Expansion erhält die Firma im 1991 durch die neue Produktionslinie Radgelenke und im Jahre im 1999 kommen dann Antriebswellen hinzu. Im Juli 2001 aquiriert die Metelli S.p.A. zu 100% die Gesellschaft GRAF S.p.A. auf, eine leitende Herstellerfirma von Wasserpumpen und Brems Scheiben. Im 2008 haben wir Bremsbeläge und im 2010 Bremsbacken in unserem Produktpalette eingefuehrt um unser Bremshydraulikprogramm zu vollstaendigen. **Im Jahr 2012 hat Metelli Zusaetzlich Spannrollen Kit mit Wasserpumpe und Faltenbalg-Satz im Programm vorgestellt.***

*La firma Metelli nace el 1 de Agosto de 1962 como taller para mecanizaciones. En 1970 comienza la realización de piezas para motores y ya en 1975 inicia la fabricación de piezas para frenos y embragues hidráulicos. Un mayor impulso a la expansión llega en 1991 con la instalación de una línea para la producción de juntas homocinéticas a las que se añadirán los semiejes en 1999. En el mes de Julio de 2001 Metelli S.p.A. adquiere el 100% de la firma GRAF S.p.A., fabricante líder de bombas de agua y discos de freno. En 2008 se introduce la gama de pastillas de freno y en 2010 la de zapatas de freno para completar la gama de frenos. **Los kit distribución con bomba de agua y los fuelle se introdujeron en 2012.***

XVII

Illustrazione di giunti di vario tipo, scomposti nei loro elementi principali - campana, gabbia, nucleo, sfere con un semiasse tipo su cui vanno montati, completo di alcuni accessori - cuffia in gomma, fascette... L'ingrandimento fotografico della gabbia, mette in risalto che tutti i dodici punti di contatto / alloggiamento delle sfere, sono rettificati con tolleranze di micron, aumentando quindi la perfezione di accoppiamento e la possibilità di usare sfere con unica tolleranza sul diametro, eliminando nello stesso tempo ogni possibilità di errori, o inaccuratezze di montaggio delle varie parti.

Pictures of joints of various types, disassembled in their main components - housing or outer race, cage, race or inner race, balls - along with one of the types of driveshaft which the joint are to be fitted on; the driveshaft is complete with some ancillary parts - rubber boot, clamps ..

The photographic blowup of the cage, highlights that all the twelve contact / holder points of the balls are ground to micron tolerances, increasing by that the perfection of fit and the possibility to use balls of one tolerance only, in micron, on the diameter, and excluding at the same time any chance of mistakes or inaccuracies when assembling the various components.

Images de joints de types divers, démontés dans ses composants principaux - carter, cage, noyau, billes avec un des types de transmission sur lequel ces joints sont montés; la transmission avec d'autres accessoires - soufflet en caoutchouc, colliers de serrage...

L'agrandissement photographique de la cage fait bien ressortir que tous le douze points de contact / logement des billes sont rectifiés avec de tolérances de micron, augmentant pour cela la perfection d'accouplement et la possibilité d'utiliser billes de la plus haute précision et avec une tolérance unique sur le diamètre, éliminant en même temps toute possibilité d'erreurs ou négligences dans l'assemblage des composants divers.

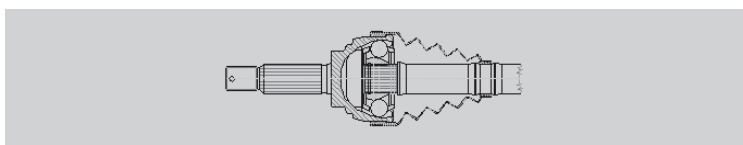

Bilder verschiedener Gelenktypen, zerlegt in ihre Hauptbestandteile - Gehäuse, Käfig, Kugelnabe, Kegeln zusammen mit einem der Gelenkwellentypen, auf den dieses Gelenk montiert wird; die Gelenkwelle ist komplett mit den Zusatzteilen - Manschette, Schellen...

Die vergrößerte Fotografie des Käfigs verdeutlicht, daß alle zwölf Kontaktpunkte der Kugeln bis auf Mikrontoleranzen geschliffen sind, so daß ein Maximum an Paßperfektion erreicht wird. Hierdurch wird ein einerseits die Möglichkeit gegeben, nur Kugeln einer Größe mit gleichem Durchmesser, zu montieren; andererseits wird ausgeschlossen, daß bei der Zusammensetzung der Einzelteile Ungenauigkeiten oder Fehler unterlaufen.

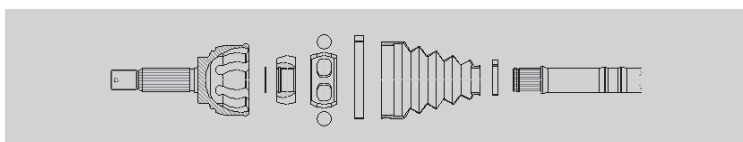

Representacion de junta de diverso tipo, desmontadas con sus elementos principales - campana, jaula, nuez, bolas - con ilustracion del semieje donde van montados, completo con algunos accesorios - fuelle de goma, abrazadera...

La ampliacion fotografica de la jaula pone en evidencia que los doce puntos de contacto / alojamiento de las bolas estan rectificadas con tolerancia de micras, resaltando por lo tanto la perfección de la union y la posibilidad de usar bolas de maxima precision con unica tolerancia en el diametro, eliminando asi cualquier posibilidad de error.

Rimozione dei giunti dall'albero di trasmissione / Removal of c.v. joints of driveshaft

Lato ruota / wheel side

Chiudere in morsa l'albero di trasmissione. Rimuovere le fascette e togliere la cuffia dal giunto facendola scorrere sull'albero di trasmissione.

Grip the driveshaft securely in a vise. Remove the clamps. Take the boot off the joint by sliding it along the driveshaft.

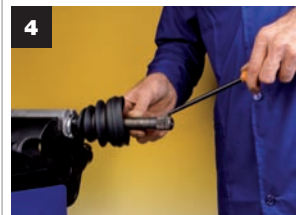

Qualora l'anello di sicurezza sia visibile lo si dovrà allargare, sfilare il giunto colpendolo sulla faccia frontale.

If the circlip is visible, spread it open and slide the joint off the shaft, striking it gently on the front face with a plastic hammer.

In caso di giunti con anello di sicurezza interno (non visibile) si dovrà sfilare il giunto colpendolo sulla faccia frontale del nucleo.

If the circlip is internal (not visible) the joint has to be removed from the shaft by striking it on the front face of the inner race.

Rimuovere l'eventuale anello di sicurezza e togliere la cuffia dall'albero. Pulire la scanalatura dell'albero verificando che la dentatura non sia danneggiata.

Remove the retainer ring, if any, on the driveshaft. Take the boot off the driveshaft. Clean the driveshaft along the grooved part and check that the teeth are intact.

Lato cambio / gearbox side

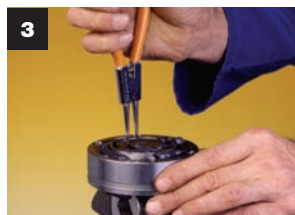

Chiudere in morsa l'albero di trasmissione. Rimuovere la fascetta piccola e togliere la cuffia con il proprio coperchio dal giunto.

Grip the driveshaft securely in a vise. Remove the small clamp. Remove the boot with its cap by sliding it off the driveshaft.

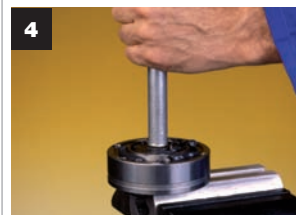

Togliere l'eventuale coperchio di protezione assicurandosi di non danneggiarlo perché dovrà essere riutilizzato in fase di assemblaggio.

Remove any protective cap taking care not to damage it because it will have to be used again for assembly.

Posizionare il giunto sopra le ganasce della morsa in modo che l'albero di trasmissione risulti in posizione. Aprire l'anello di sicurezza con le apposite pinze.

Position the joint over the jaws of the vise so that the driveshaft is in a vertical position facing downward. Open the circlip using the special pliers.

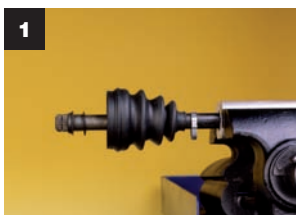

Sfilare l'albero dal giunto colpendo la faccia frontale dell'albero. Togliere la cuffia con il proprio coperchio e l'eventuale molla a tazza dall'albero. Pulire la scanalatura dell'albero verificando che la dentatura non sia danneggiata.

Slide the driveshaft out of the joint by striking the front face of the shaft. Remove the boot from the driveshaft, with its cap and the Belleville washer, if any. Clean the driveshaft along the grooved part and check that the teeth are intact.

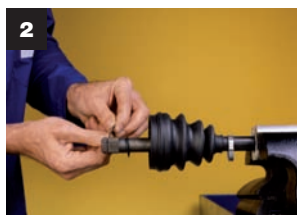

Montaggio dei giunti sull'albero di trasmissione / Assembly of c.v. joints on driveshaft

Lato ruota / wheel side

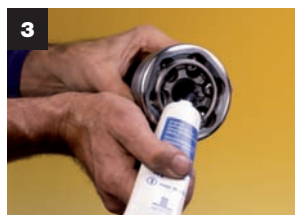

Posizionare la fascetta piccola e la cuffia sull'albero. In caso di giunto con molla a tazza e rondella di chiusura spingere questi pezzi sull'albero.

Place the small clamp and the boot on the shaft. If the joint is provided with a Belleville washer and lock washer, push these parts onto the shaft.

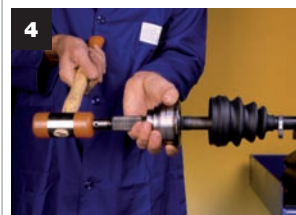

In caso di giunti con anello di sicurezza interno di forma circolare questi deve essere collocato nella scanalatura dell'albero. Usare sempre un anello di sicurezza nuovo. Qualora il sistema di fissaggio preveda un seeger questi è fornito dalla Metelli già posizionato nel nucleo.

If the joint has an internal circlip this has to be fitted in the groove on the driveshaft. Always fit a new ring. If the fastening system requires a Seeger ring this is supplied by Metelli already in place on the inner race.

Lo standard Metelli prevede giunti pre-lubrificati con la quantità di grasso ottimale. Fanno eccezione alcuni giunti per i quali il grasso viene fornito a parte: in questo caso si dovrà riempire il giunto con circa metà del grasso fornito.

According to the Metelli standards, joints are supplied pre-lubricated with the optimum amount of grease. A few types of joints are supplied with a separate container of grease. In this case the joint should be filled with about half the grease in the container.

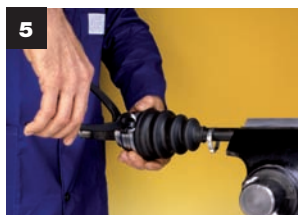

Accoppiare le scanalature del nucleo con quelle dell'albero: porre attenzione all'anello di sicurezza. Utilizzando un martello di plastica spingere lentamente il giunto sull'albero sino a quando l'anello di sicurezza si è chiuso a scatto. Controllare che il giunto non abbia la possibilità di scorrere sull'albero.

Match the splines on the inner race with those on the grooved part of the shaft. Pay particular attention to the retainer ring. Using a plastic hammer, push the joint onto the shaft slowly until the retainer ring snaps shut. Do not fail to check that the joint is fitted securely on the shaft and cannot slide.

segue

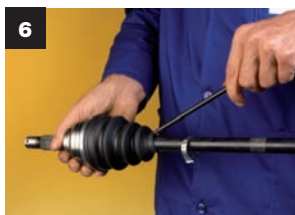

Montaggio dei giunti sull'albero di trasmissione / Assembly of c.v. joints on driveshaft

Lato ruota / wheel side

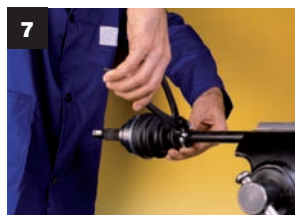

Se il grasso è fornito a parte utilizzare quello rimasto per ingrassare completamente il giunto. Calzare la cuffia e stringere la fascetta grande con la pinza. Controllare che la cuffia sia ancorata al giunto.

If the grease has been supplied separately, use the remaining amount to grease the joint completely. Fit the boot on the joint in the correct position and tighten the large clamp with pliers. Make sure the boot is securely anchored to the joint.

Usando un cacciavite interposto tra la cuffia e l'albero di trasmissione far fuoriuscire l'aria dalla cuffia.

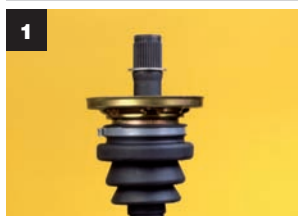

Insert a screwdriver between the boot and the driveshaft to let the air out of the boot.

Stringere la fascetta piccola e controllare che la cuffia sia ermeticamente chiusa. Far effettuare al giunto alcune rotazioni rispetto all'asse dell'albero per controllare la correttezza dell'installazione eseguita.

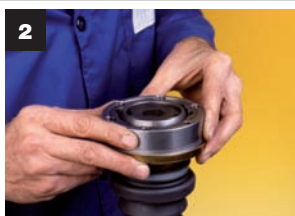

Tighten the small clamp using pliers and check that the boot is hermetically sealed. Turn the joint a few times around the shaft axis to check that it is correctly installed.

Lato cambio / gearbox side

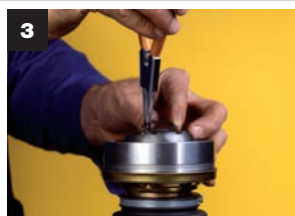

Posizionare la fascetta e la cuffia con il proprio coperchio sull'albero. In caso di giunto con molla a tazza posizionarla correttamente sull'albero di trasmissione.

Place the clamp and boot with its cap on the shaft. If the joint is provided with a Belleville washer, position it correctly on the driveshaft.

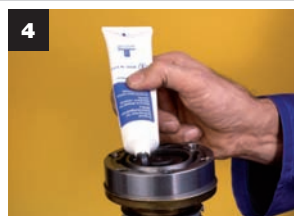

Accoppiare le scanalature del nucleo con quelle dello scanalato dell'albero e spingere il giunto se fosse necessario battere attentamente sul nucleo.

Match the grooves on the nucleus with those on the grooved part of the shaft and push the joint onto the shaft. If necessary, strike carefully on the inner race.

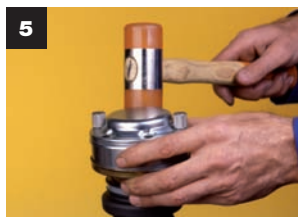

Applicare l'anello di sicurezza nella gola dell'albero di trasmissione. Usare sempre un anello di sicurezza nuovo.

Fit the retainer ring in the groove on the driveshaft. Always use a new ring.

Riempire il giunto dal lato opposto della cuffia con circa metà del grasso contenuto nel tubetto fornito.

Fill the joint from the side opposite the boot with about half the grease in the tube supplied.

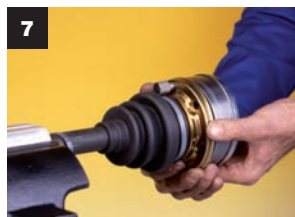

Montare l'eventuale coperchio di protezione assicurandosi di far coincidere i fori con quelli del giunto.

If a protective cap is provided, fit it in place taking care to match the holes with those on the joint.

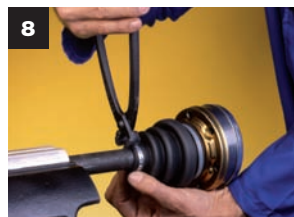

Riempire il giunto dal lato della cuffia con il grasso rimanente.

Fill the joint from the boot side with the remaining grease.

Far calzare il coperchio della cuffia sul giunto prestando attenzione a far coincidere i fori con quelli del giunto.

Fit the cowling cap on the joint taking care to match its holes with those on the joint.

Chiudere la fascetta piccola in modo che la cuffia risulti saldamente ancorata all'albero di trasmissione.

Close the small clamp so that the boot is securely anchored to the driveshaft.
